

9 cabinets on 7 games need a look this morning.

Monster Drop 2: no plays since Aug 24; Dizzy Ducks 1: no plays since Sep 7; Big Reel Fishing 1: stopped paying tickets, and it usually pays 9 a dollar, and 4 more.

The whole floor ran at 74% of its usual for these weekdays, and the plays flags allow for that.

SILENT

2

cabinets that usually play and haven't all week

PAYING OUT MORE

1

paying 50%+ more tickets per dollar than usual

PAYING OUT LESS

2

paying 40%+ fewer tickets per dollar, or none

PLAYS FAR FROM NORMAL

2

at half or double their usual Share of 1000 Plays

SILENT CABINETS

Cabinets that played every week over the last 8 weeks and have not played since the date shown. Walk to these first.

Name	Last play	Usually	What moved
Monster Drop 2	Aug 24	163 a week	no plays since Aug 24
Dizzy Ducks 1	Sep 7	165 a week	no plays since Sep 7

PAYING OUT MORE THAN USUAL

Cabinets paying at least 50% more tickets per dollar than they usually do. Usually a dispenser giving extra, or a payout setting that moved.

Name	This week	Usually	What moved
Coin Cascade Pusher (all 3 cabinets)	34 tkt/\$	17 tkt/\$	up 100%

PAYING OUT LESS, OR STOPPED

Cabinets paying at least 40% fewer tickets per dollar than they usually do, or none at all where they paid before. Usually a jammed or empty dispenser.

Name	This week	Usually	What moved
Big Reel Fishing 1	0 tkt/\$	9 tkt/\$	stopped paying
Ticket Tornado 2	5 tkt/\$	11 tkt/\$	down 55%

PLAYS WELL BELOW NORMAL

Cabinets taking half or less of their usual Share of 1000 Plays: of every 1,000 plays on the floor, how many were on this cabinet this week against what it usually takes. Usually a card reader, a screen, or a game nobody can start.

Name	Share of 1000 Plays	Usually	What moved
Skee Lanes 4	3.7	11.6	32% of usual share

PLAYS WELL ABOVE NORMAL

Cabinets taking at least twice their usual Share of 1000 Plays: of every 1,000 plays on the floor, how many were on this cabinet this week against what it usually takes. Free play, a stuck button, a popular game, or players moving over from a sibling that is down.

Name	Share of 1000 Plays	Usually	What moved
Hoop Fever 3	41.4	17.4	2.4x usual share

OUT OF SERVICE

Cabinets your team has marked out of service in Parafait, newest first. They are expected to be silent and are not counted above.

Name	Since	Reason
Claw Carnival 4	Aug 21	Reader Issue -- Card reader not reading, part ordered

Every cabinet is judged on its own: usual means what that cabinet did over its last 8 complete weeks, weekday for weekday, so a Saturday is judged against Saturdays. Share of 1000 Plays is how many of every 1,000 plays on the floor were on the cabinet, this week against its usual over those 8 weeks, so a quiet week on its own flags nothing and a dearer game is not penalised. A cabinet that never paid tickets is not flagged for paying none. Reversed plays are left out, and technician plays are left out of the ticket counts. A day runs 4am to 4am. 'All' means every cabinet of a game moved together; 'across' means the game crossed the line and no one cabinet did alone.
